

Parv Jain

Full-stack Engineer · AI Products

parvj5212@gmail.com · (+91) 81284 63740 · [GitHub](#) · [Portfolio](#) · [LinkedIn](#)

Summary

Full-stack engineer focused on AI-powered products: prompt systems, structured LLM outputs, evaluation pipelines, and end-to-end product ownership. Comfortable shipping Next.js/TypeScript apps backed by Claude/OpenAI, classical NLP scorers, scraping/enrichment workflows, and production AWS media pipelines. Looking for early-stage AI roles (agents, memory, evals, applied LLM products) at startups.

Experience

TB10 Platform (Game Infrastructure)

Full-stack Developer

Remote

Feb 2026 – Present

- Own frontend, backend, and system design for a tournament platform with real-time multiplayer-style state sync.
- Built high-performance React/Tailwind UI and Node.js services for game logic, APIs, and scalable workflows.

Blolabel

Full-stack Developer

Remote

Nov 2024 – Feb 2025

- Shipped a document annotation platform with structured labeling, layered metadata, and interactive real-time editing.
- Built HLS video processing on AWS S3 + MediaConvert (chunked upload, streaming playback).
- Integrated AI audio cleanup (Cleanvoice) and speech/transcription providers (OpenAI Whisper, AssemblyAI, Azure Speech).

Octasol

Contributor – Workflow Integration

Remote

Jul 2025 – Aug 2025

- Integrated an automated GitHub-bot workflow for task-based settlement; collaborated on testing and production rollout (PR #52).

Projects

Circe

TypeScript · T3 Code · Electron · React · Node.js

Voice Control Plane for Coding Agents

2026 – Present

- Built a voice-first control plane that routes a spoken request to the machine and coding agent that own the work, grounded in real projects and tasks instead of model guesses.
- Designed a no-LLM interpretation core that asks small grounded questions and derives actions in code, so a model never invents an id, picks between ambiguous matches, or acts unsupervised.
- Added desktop and browser control behind confirmation gates, plus multi-machine discovery, pairing, and remote control over existing coding-agent subscriptions.

Rivvl

Next.js · Claude · Firecrawl · Supabase · Inngest

AI Comparison Platform

2025–2026

- Built an AI comparison product for vehicles and homes: scrape/enrich listings, then generate structured multi-section analysis reports via Anthropic Claude with strict JSON schemas and deterministic formatting rules.
- Designed failover across model providers, background report pipelines (Inngest), and PDF report generation for paid/free tiers.

Prompt Quality Evaluator

Python · spaCy · NLTK · scikit-learn

Offline Prompt Scoring Engine

2025

- Built a transformer-free prompt quality engine scoring 19 metrics across 8 rubric dimensions using classical NLP (discourse graphs, TF-IDF, readability ensembles) with zero LLM API calls.
- Shipped CLI + JSON mode for CI integration, radar-chart reports, and deterministic rewrite suggestions.

DropLert

TypeScript · npm

Developer Notification Toolkit

2024–2025

- Published a plug-and-play real-time notification package (toast/modal/alert) with theming and simple npm integration.

Education

M.S. Ramaiah Institute of Technology

B.Tech – Computer Science Engineering

Bengaluru

2023 – 2027

- GPA: 9.49 / 10.00 · Coursework: DSA, OS, Web Development, Cloud & DevOps

Skills

AI / LLM: Prompt engineering · Structured outputs / JSON schemas · Claude & OpenAI APIs · Offline NLP evals (spaCy, NLTK) · Speech/transcription (Whisper, AssemblyAI) · Scraping + enrichment (Firecrawl)

Languages: TypeScript · JavaScript · Python · SQL

Frameworks: Next.js · React · Node.js · Express · Tailwind · React Query · Inngest

Data & Cloud: PostgreSQL · Redis · MongoDB · Supabase · Prisma · AWS (S3, MediaConvert) · Docker · GitHub Actions · Kubernetes basics
