SUMMARY

Full-stack engineer building developer tools and real-time products end to end with TypeScript, React/Next.js, and Node.js, backed by Python, PostgreSQL, and AWS. Focused on grounded voice interfaces, deterministic NLP, and reliable media workflows.

EXPERIENCE

TB10 Platform **Remote**
Full-stack Developer *Jan 2026 – Jun 2026*
- Owned end-to-end frontend, backend, and system design for a full-stack tournament platform.
- Built React/Tailwind interfaces and Node.js services for game logic, APIs, and tournament workflows.
- Implemented real-time state synchronization for interactive, multiplayer-style play.

Octasol **Remote**
Contributor, Workflow Integration *Jul 2025 – Aug 2025*
- Built a GitHub-driven escrow workflow and Solana smart contracts for secure payments.
- Contributed to on-chain execution, testing, and production rollout (PR #52).

Blolabel **Remote**
Full-stack Developer *Nov 2024 – Jun 2025*
- Shipped a document annotation platform with structured labeling, layered metadata, and real-time editing.
- Built an AWS S3/MediaConvert HLS pipeline with chunked uploads and streaming playback.
- Implemented an end-to-end Cleanvoice AI audio-cleanup pipeline.

PROJECTS

Circe | *TypeScript, React, Electron, Node.js, T3 Code* 2026 – Present
- Built a voice-first control plane that routes spoken or typed requests to the right project, task, and machine using existing coding-agent subscriptions.
- Grounded routing in live host state, with clarification for ambiguous matches; added multi-machine pairing and confirmation-gated desktop/browser control.

Prompt Quality Evaluator | *Python, spaCy, NLTK, scikit-learn* 2025
- Built a transformer-free engine scoring prompts on 19 metrics across 8 rubric dimensions using discourse graphs, TF-IDF, and readability measures, with no LLM API calls.
- Added a CLI with JSON output for CI, radar-chart reports, and deterministic improvement suggestions.

Okito | *TypeScript, Solana, React, Next.js* 2025
- Built a typed TypeScript SDK and React integrations for Solana payments, wallet connectivity, token operations, and transactions.
- Ranked among the top submissions in a 100xDevs hackathon hosted on Superteam.

DropLert | *TypeScript, React, Next.js, PostgreSQL, npm* 2024 – 2026
- Published an npm package for themed in-page notifications and alerts, including toasts and modals.
- Reworked v2 from WebSocket broadcasts to durable PostgreSQL-backed campaigns delivered over a cacheable HTTP feed with ETag revalidation.

EDUCATION

M.S. Ramaiah Institute of Technology Bengaluru, India
B.Tech in Computer Science Engineering, GPA 9.49 / 10.00 2023 – 2027
Coursework: Data Structures and Algorithms, Operating Systems, Web Development, Cloud and DevOps.
